

Des Moines developer agreements & TIF incentives

City Council record · 2016-07-01 – 2026-07-14 · compiled 2026-07-15 from councildocs.dsm.city (agendas, minutes, council communications)

Coverage

237 regular council meetings scanned (13,412 agenda items). 406 incentive-related council actions were fully extracted and collapsed into 202 distinct projects. Of these, 85 single projects state an explicit TIF amount (total \$215,466,947) and 120 state a total development cost (total \$3,487,173,600; excludes multi-project WHTC batch actions). All other money cells are blank and flagged — the figure exists only in the signed agreement exhibit and was never estimated.

Project types

Residential 66 · Other 33 · Mixed-use 28 · Office 18 · TIF district / UR plan 13 · Industrial / warehouse 13 · Hotel 10 · Commercial (MAA / abatement) 8 · Retail / restaurant 8 · Parking 5. Types are classified from council item text (project names first, staff-report notes as fallback); “Other” means the source text does not state a use.

Method & honesty notes

Dollar figures come primarily from Council Communications (staff reports); agendas supply item descriptions and minutes supply disposition, roll-call number and vote. Multi-meeting deals (preliminary terms → final terms → amendments) are clustered by address and project identity; the development-agreement approval is the row of record and prior/subsequent actions appear in the timeline. TIF % of cost is computed only where both figures are stated. Workforce Housing Tax Credit batch actions are shown but excluded from summary totals (they aggregate several developments and can double-count single-project rows). Housing-agency meetings and consent packets are not yet included. Some 2026 items lack posted minutes; their dispositions are blank.

Actuals — Iowa Dept. of Management urban-renewal filings

The authoritative record of TIF the city actually collected and paid, FY2012–2024. Over the period Des Moines collected \$429,242,842 in increment and rebated \$211,459,973 to developers — an independent corroboration of the project-level staff projections above. Actuals lag approvals (rebates flow years after completion), so 2020s approvals show little actual payout yet. Source: Iowa Dept. of Management / Iowa Data Hub datasets 779 & 1002.
